

THE WORLD OVER

KIDNAP SLAYER CONFESSES

LOS ANGELES—Eddie Hoover, head of the United States Federal Bureau of Investigation has announced that Paul Anderson has been arrested and has confessed to the kidnap slaying of Charles S. Ross in Chicago last September. Hoover said that over \$14,000 of the ransom money had been recovered.

HON. W. WALSH DIES AT COAST

VICTORIA—Hon. W. Walsh, veteran Alberta politician and Lieutenant-Governor of the province from 1931 to 1936, died here late Thursday. Death came suddenly to the 76-year-old man, who was not expected. He had been in indifferent health for some time since coming here a little more than a year ago and recently suffered a stroke. A heart seizure followed Thursday.

334 MILLIONAIRES IN GT. BRIT.

LONDON—Millionaires in Great Britain during the fiscal year 1935-36 numbered 334, including 95 whose incomes were over £100,000 (£50,000), according to figures available.

The other class was bigger than in the year 1934-35, when it only numbered 30.

Seventy-one millionaires had incomes ranging from £25,000 to over £100,000.

MAY MAKE PAPER FROM STRAW

PITTSBURGH—A Pittsburgh scientist—one-time student of Thomas A. Edison—has found a process by which he has discovered a process for making relatively inexpensive新闻纸 and synthetic cotton from straw.

Dr. Frederick W. Hoehnster, who came from Germany 35 years ago, said under his present conditions, it would be well to make paper from straw with the present cost of \$50.

It would be more flexible, less brittle after being exposed to light, would not discolor, would be lighter, and take less ink than paper made in use, he declared.

The scientist said he obtained a patent, which after bleaching is applied to ordinary wood pulp, by his device straw treatment it chemically then deharden it. From this either paper or paper pulp can be produced, he said.

Dr. Hoehnster explained the secret lies in extracting certain non-fibrous elements from the natural material.

U.S. WANTS MORE BATTLESHIPS

WASHINGTON—High authorities stated this week that Great Britain and the United States were attempting to disregard London Naval Treaty II limitations on the size of battleships if recent developments that Japan was building large dreadnaughts.

This disclosure came while President Roosevelt was drafting a special message to Congress asking for an expanded naval construction. One of the principal considerations receiving his attention was the possibility the United States might be forced to build bigger ships as well as more battleships if it was to retain naval superiority over Japan.

FORMER CARBON BOY REACHES HEIGHT OF AMBITION IN 7 YEARS

Wanted to Purchase Farm in Vicinity of Carbon

Wife Carter, former Carbon boy who has established himself in the radio world, is at present in California. In an interview recently with one of the Alberta reporters he stated that he had achieved all his ambitions. A publisher.

"What price glory?" is a question that many famous men have asked themselves.

"Often they are forced to admit that the price has been exorbitant for the value received. Perhaps only a few are content once they have reached that point."

"Wife Carter, cowboy yodeller of the Columbia Broadcasting System, who now resides in some of the unknowns known throughout the North American continent, is one of the few."

"I have achieved all my ambitions," said Carter, who is spending a three-month holiday in California for the first time back here in two years.

"I wanted to live over a national network. I wanted to make a fortune. I wanted to buy a farm near Carbon. Now I have all those things, and I am content."

Toddy White Carter is a radio star of the first magnitude.

LONG YEARS AGO ▶

January 20, 1923

Final arrangements are now being made by the C.P.R. for the building of the proposed "Y" on the island, within the townsite of Carbon. Construction will begin immediately.

The question of the purchase of a farm for the proposed "Y" was discussed by the V.I. and Council this week and it was decided the village could get along without one.

The information taken in the back of the Farmers' Exchange committee, T. Paxton won the cup for 1923-24 season.

T. J. King has taken the money for Rawleigh goods in this district.

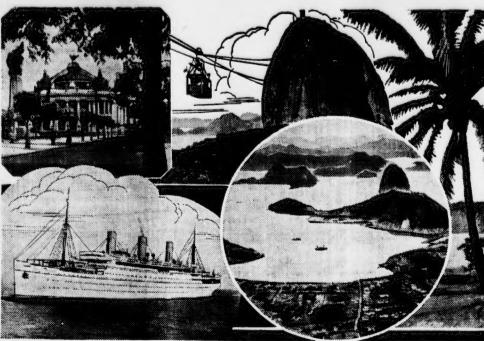

Born to Mr. and Mrs. Alex Reid on Monday, January 6, a daughter, Mrs. S. F. Torrance, a daughter.

CONCORDE

In its second week it was incorrect that the Concorde had been sold to the Farmers' Committee, it was on February 7th. While this is official nomination day, owing to unforeseen circumstances the date has been postponed to the 14th.

It has also been pointed out that nomination of candidates closes at 12 o'clock noon on the above named day.

Eagle's View of Rio for Cruise Members

Not flying nor rolling down to absorb the beauty of the land, but sailing on the happy crowd of winter cruise tourists next January when the Canadian Pacific liner Empress of Australia heads south from York January 15 on a West Indian and South American cruise.

The ship is the Latin city that was named Rio de Janeiro because its harbor was discovered in the month of January and named for the river which flows into it.

Claims for the harbor is the subject of a long-standing dispute between Brazil and Argentina. Other ports would have to share much to rival this claim, and the Sugar Loaf itself.

Besides these two excursions there are four others planned for the five-day visit. The lovely mountainous region of Tijuca and the mountainous residential section

of Petropolis will be the objects of excursions and each evening to Corcovado, a mountain peak on which stands a huge figure of Christ the Redeemer.

Rio is not the only port of call for the liner. The Bahamas and Jamaica are islands that will be visited during the 32 day trip.

Thrilling in itself is the ascent of the Sugar Loaf itself, the most popular tourist attraction in the city.

Other passengers who will be back in New York on February 17.

On Sunday night the Teatro Municipal at Rio, a view of Botafogo Bay, the Corcovado and the Sunsets will be the chief ear-ascending the latter, and the Empress of Australia, the cruise ship that will visit Rio

HUGH JOHN MACDONALD A UNIVERSITY DEBATER

Last Thursday's Calgary Albertan contained a photo of Hugh John Macdonald, former Carbon boy who is now attending Alberta University.

Since his graduation with a law degree at the University of Alberta and prominent in college debate, Hugh John Macdonald will be a member of the Columbus Debating Club in the fall.

Norman F. Priestly, vice-president of the U.P.A., announced the communiqué that Macdonald would be a representative of the Columbus Debating Club in the fall.

Macdonald will be a representative of the League of Nations on an Anglo-American alliance, and will hold in the hotel ballroom.

SOCIAL CREDIT LEAGUE ASKS CO-OPERATION

EDMONTON—With a view to convincing the next F.D.R. election, proposals for an inter-territorial co-operative credit system for the various economic fields requiring economic freedom demand that a proposal of credit would be placed to be before the annual convention of the United Farmers of Alberta this Friday.

Alberta Social Credit League, a result of a resolution at their annual meeting in Calgary last Friday.

Parliament Gardiner, former member of parliament and president of the U.P.A., telephoned the league last week that the situation would be calling for a representative of the league if the U.P.A. delegates were allowed to ask questions after the league's proposals had been outlined.

THATCHER TOO LATE FOR CENTRAL ALBERTA

The dominion experimental station at Lacombe recommends that Thatcher wheat should be left alone by breeders in Central Alberta as it does not come into full flower until late.

It is now in general use, at Lacombe

Thatcher is about nine days later than Red Bob, and dries later than Reward and three days earlier than

Red Bob, but about two days earlier

maturing than Marquis. Thatcher producer almost the same yields as Marquis, but its grain is lower in protein content, is lower yielding than the other varieties, it has stronger straw and produces greater quality grain.

Western Canada has overcome the rust problem, but the Lacombe experiments show that it has no place in Central Alberta.

Marquis is a good variety, but its kernels are not attractive in appearance and its status as a milling wheat has not yet been fully established.

It is recommended that Marquis should be continued, but Thatcher should instead

replace Red Bob, Reward or Marquis.

It is recommended that the grain quality as well as to increase yields and improve the quality of the grain.

The territories west of the C. & E. Experimental station at Estevan, Saskatchewan should restrict

seedings to Reward and Red Bob, but east and south of those boundaries Marquis can be grown with the use of fertilizers to attain maturity.

Jane—My Scotch boy friend sent me his picture yesterday.

Jane—How do you look?

Jane—I don't know yet, I haven't had it developed.

DECISION RESERVED ON DISPUTED LEGISLATION

OTTAWA—Lawyers had a conference on the Alberta constitutional reference.

Decisions on questions referred to the Supreme Court of Canada as to validity of three Alberta bills and the Alberta Government's right to amend its constitution.

On the first question referred to the Supreme Court of Canada as to validity of three Alberta bills and the Alberta Government's right to amend its constitution, the Alberta legislature will be allowed to proceed.

On the second question referred to the Supreme Court of Canada as to validity of the Alberta bills and the Alberta Government's right to amend its constitution, the Alberta legislature will be allowed to proceed.

On the third question referred to the Supreme Court of Canada as to validity of the Alberta bills and the Alberta Government's right to amend its constitution, the Alberta legislature will be allowed to proceed.

Mr. and Mrs. W. Foxon and Lawford Drummond, and Wilfred Foxon of East Central Alberta, living in town in the winter, will be represented by Mr. and Mrs. Fred Poxon, and Frank McNeely.

A complete account of the winners will appear in our next issue.

21 RINKS ENTERED IN THE CARBON BONSPIEL WHICH STARTED TUES.

Play Gets Under Way Tuesday Morning With 8 O'Clock Draw

The annual bonspiel of the Carbon Curling Club commenced on Tuesday morning at 8 o'clock with 21 rinks entered in the three sections.

The first nine out-of-town rinks entered in the spilt besides the 12 local rinks, and with such a large entry a draw was held at 10:30 a.m. to determine what rink would get off as many games as possible in the first two days of the bonspiel.

The following rinks have entered:

Three Hills—Mark Holomest and Wm. Goett.

Drumheller—Alex Johnson, Tommy Dick and Fred Poxon.

Calgary—Jas. Flaws, Dick Gimbel, Gish Dinh, S.W. Wright, Sam Garrett, Alex Poxon, R. Skerry, A.F. McKibbin Len Smith, Percy Edwards, Chas. F. Smith, F.J. Smith.

There are two main competitions this year, the Peerless Carbon Collier and Ontario Laundry.

The following is the program of the games which have been played up to 10 p.m. Wednesday, January 19th:

(Holomest of Three Hills did not come to play, and Parks and Irricana has taken his position in the draw).

Peerless Carbon Event—McNeely defeated Garrett; Park defeated Flaws; McNeely defeated Tricker; Edwards defeated Dick; Bessent defeated Garnet; (defeated) Poxon defeated Edwards; Skerry defeated Gimbel (defeated); Smith defeated Wright and L. Poxon defeated Dishaw.

Ontario Laundry Event—A. Poxon won from Garnet; (defeated); McNeely defeated Neelish; Tricker defeated Wright; Poxon defeated Edwards; Skerry won from Holomest (defeated); Gimbel (defeated); Smith defeated Wright and L. Poxon defeated Dishaw.

Carson Laundry Event—A. Poxon defeated Garnet; Park defeated Flaws; McNeely defeated Tricker; Edwards defeated Dick; Bessent defeated Garnet; (defeated) Poxon defeated Edwards; Skerry defeated Gimbel (defeated); McNeely defeated Wright; Smith defeated Wright and L. Poxon defeated Dishaw.

Mr. and Mrs. W. Foxon and Lawford Drummond, and Wilfred Foxon of East Central Alberta, living in town in the winter, will be represented by Mr. and Mrs. Fred Poxon, and Frank McNeely.

A change in the draw will be effective in our next issue.

Mr. and Mrs. W. Foxon and Lawford Drummond, and Wilfred Foxon of East Central Alberta, living in town in the winter, will be represented by Mr. and Mrs. Fred Poxon, and Frank McNeely.

THE DEPOSIT NORTH ONTARIO

TIMMINS, Ont.—Discovery of a tin deposit in Carleton township, 23 miles west of Timmins, was reported yesterday by W.V. Hockley, manager of the mine, who said the ore is being treated by the Ontario Department of Mines showed mineral taken from his property had a value of \$1,000 per ton.

Tin in commercial quantities has never been mined in North America, the world's supply coming from Federated Malay States, Bolivia, Dutch East Indies, China and Siam.

CHANGE IN HOUSEWIVES

Red Bus Lines Limited have announced a change in their schedule for the winter months only. This change will affect all the late afternoon buses which will leave Hanna at 4 p.m. for Central at 5 p.m., arriving at the Central Service Station at 7:45 p.m. and arriving in Calgary at 9:30 p.m. The change is effective January 20th.

Economical Housewives

There was a day when the housewives bought the faraway "bargain" in the belief that it was good business to save a few pennies. But experience taught them a few things.

Today's housewives do not buy blindly. They examine the article first and when satisfied with the product they pay a fair price at home. It is economical to make your purchases in

CARBON

A Worthy Objective

There may be a good many people in Western Canada who could not give the exact location of Kingsville, Ontario, but there are very few who have not heard or read about, and some who have visited, the institution for which Kingsville is famous—the so-called Miner sanctuary operated by Jack Miner, the great friend of bird life and of nature.

Even those who are only slightly familiar with the great work that is being done by Jack Miner to conserve bird life for the enjoyment of property and to promote love for and kindness to wild life among adults and children, will be more than glad to learn that efforts are being made, not only to preserve the sanctuary for all time to come, but to enlarge it and thus extend the scope of its usefulness by adding to the premises.

Fame Is Widespread

The fame of Jack Miner's bird sanctuary has extended far beyond the boundaries of Canada, even beyond the limits of the continent. His conservation plans for the benefit of future generations are almost as well known in Europe as in Canada and the United States, and only two years ago he was approached by officials of the Government of Czechoslovakia for information and advice, as a result of which that country today has a large number of sanctuaries, and the Jack Miner sanctuary at Kingsville, Ontario, is famous throughout the world.

Those who have visited the Miner sanctuary at Kingsville know well enough the value of the work that has been done, and their reaction to it is to realize that it also has a material economic value. Tourists from all countries of the world are drawn to his place and more depart without carrying away with them pleasant recollections of scenes of beauty and lessons on conservation to serve a lifetime.

A Great Influence

A succinct summary of the value of the work of this pioneer bird bander is contained in the following tribute paid by Arthur Jensen, Game Warden for Essex County, Ontario, in a recent broadcast:

"In the name of the people of Essex County, and my first sanctuary at Kingsville, Ontario, holds the same place in conservation as Mr. Henry Ford holds in the realm of industry. Jack Miner has been twenty years ahead. The sanctuary system of conservation and artificial feeding of bird life which has been practised from coast to coast for the last twenty-five years has resulted in an amazing number of individuals having copied, as well as State, Provincial and Federal governments, with the result that birds are alive today, yet, perhaps, nowhere through Jack Miner's influence both directly and indirectly."

What Jack Miner has done in the past quarter of a century to preserve many species of game birds and to help in the protection of future generations is the envy of the world, and that is beautiful in Nature and for the benefit of the tourist, and industry dependent upon the tourist, cannot be calculated in dollars and cents. His work is a monument which will endure throughout the ages and will be recorded in the pages of history, and the sanctuary itself is a memorial which should be preserved for the nation, for future generations, and as an attraction for visitors from other countries of the world.

Ad Is Required

Although some assistance has been rendered by governments to Jack Miner's enterprise, unfortunately work has been carried on at a pecuniary loss and the operation of the sanctuary is encumbered by a deficit of \$10,000. He himself has passed the allotted three score years and ten and there is no guarantee that the enterprise at Kingsville will or can be carried on after his death unless some public-spirited individual or organization takes over the management.

It is reported that an endowment of approximately a million dollars is required to ensure this happy consummation, with an additional \$25,000 to provide for an extension of the present crowded facilities.

World Encouraged

An endowment to ensure the continuance of this work and the preservation of what amounts to an international monument would be more than a happy gesture for some such institution as the Rockefeller Foundation, which, according to a compilation in an article of Fortune magazine, has given more than \$100,000,000 to charities creating national parks on the other side of the Canada-U.S. boundary.

In the expenditures he has already made for similar objectives, Mr. John D. Rockefeller, Jr., has given evidence of his realization of the value of outdoor recreation for humanity and the endorsement of such an institution as Jack Miner's. He might well only constitute a fine gesture of international goodwill on his part—or the part of some wealthy citizen of the United States, but would emphasize the international value of Mr. Miner's efforts for the whole of mankind.

Takes The Championship

Women may be changeable, but County Auditor Earl Milliken of Seattle, gives the much-changing championship to a prospective bridegroom. The youth asked for his mother's advice, and she said that he should not marry her until he applied for the vestry. He then upon announced hymn 362: "Lord hear my prayer." The church is quick to the first girl.

Cards playing can't be very wicked; there isn't a black heart in the deck.

When Peaches Were Money

For the consolation of California fruit growers who sometimes complain of falling prices, the University of California has established that during the gold rush days of 1854, peaches sold for \$3.50 each. A year later the bottom had dropped off in price, 24 hours a day.

Giraffe Grows Rapidly

The baby born Dec. 26 at Whipsnade zoo, London, to Peter and Rose, the Banteng giraffes, grows six inches in a day. At birth it stood five feet, two inches tall. The baby giraffe grew to a height of six feet in 24 hours, a foot a day.

During the early days of the World War, sea lions were trained to track submarines.

The Problem Of Employability

Physical Fitness Engaging The Attention Of British Council

Attention of the British Council to the problem of national unemployment make a clear distinction between those who are employable and those who are not, and from statements made by Chairman Purvis of the Canadian Education Commission and other authorities it is evident that too large a proportion of the unemployed are unemployable.

As there is a close relationship of physical fitness to employability, British scholars experiment in recreation work of national interest. This work is in charge of Ian Eisenhardt, who contributes a most informative article on the subject to the latest publication of the Health League of Canada.

In the course of this article, the writer says:

"Basically, the scheme may be described as an attempt to allow all classes certain physical advantages that formerly were enjoyed by only the wealthier."

"The aim is to increase in the health of the people as the physical health of the people. You cannot have a healthy mind without a healthy body, but neither can you have a really healthy body without a healthy mind."

"The British government has launched the British Columbia Physical Training Scheme, the women were not forgotten. Physical fitness of our young women is no less important than that of the boys. And the women have available themselves of the opportunities afforded, and to-day outnumber the men members considerably."

The work of the Council is to provide an impetus to give advice and to assist in organizing, and also to induce those, who, for various reasons, would be unable to take part in sports, to make use of the available facilities.

New problems were being created by settlement of northern Saskatchewan bush land, generally even less fertile than the poor land or the drift area.

Soil And Climate

Saskatchewan Problems Dealt With By University Professor

Problems arising from Saskatchewan's soil and climate and the province's farm conditions are solved for 20 or 25 years, Prof. John Mitchell, of the Saskatchewan University soil department, told the Adult Education Association at Saskatoon.

Mr. Mitchell began a new series of addresses to the association based on the provincial government's submission to the Royal Commission on Dominion provincial relations.

Problems included soil fertility, climate, land utilization, northern settlements and the social questions raised by combination of these factors.

Saskatchewan lands had lost much fertility through drought, Prof. Mitchell declared, but practically all the soil had occurred on soils originally derived from glacial drift.

Little of the loss came from excess cropping.

With the strength of man and animal suitable to wheat production would go on producing good wheat crops in years of normal rainfall for the next 100 years. The only point to be watched was that this land be properly managed.

Now problems were being created by settlement of northern Saskatchewan bush land, generally even less fertile than the poor land or the drift area.

Research Council

Mendoza Planning For Scientific Investigation Of Waste Products

J. M. Davison, engineering secretary, announced that steps had been taken by the Winnipeg Industrial Board toward the formation of a provincial research council for scientific investigation of the waste products and surpluses in Western agriculture.

"Value of work has been done on the use of organic materials in the dairy industry," the National Research Council but may believe it is influenced too much by eastern manufacturers and political interest.

Such a research center, it is felt, might be a great service to the West.

"For the past two years, the Industrial Development Board has attempted to stimulate scientific investigation of industrial and agricultural research in Canada in the hope that work already done by the National Research Council, which has millions of dollars invested in this work, would be reviewed," he added.

Increased Armaments

Britain To Strengthen Her

Hasty's accident-7 naval program was generally viewed in London as calling for even further strengthening of Great Britain's rapidly growing navy.

Lack Of Uniformity Seen In Method Of Soil Surveying By The Various Provinces

The history of soil surveying in Canada is a comparatively short one. The first surveying at the time the Dominion was made by the Topographical Survey of the Dominion Department of the Interior in 1919, states A. Leahy, Soils Specialist of the Division of Field Husbandry, Canadian Department of Agriculture, Ottawa, in Scientific Agriculture, issued by the Canadian Society of Technical Agriculturists. In 1921 the Provinces of Alberta and Saskatchewan commenced soil surveying in their respective provinces. In the succeeding years, other provinces entered this field of work, until at the present time seven of the nine provinces have soil surveys. In 1925 the Topographical Survey greatly curtailed its services and in 1930 withdrew entirely.

With the exception of the mapping done by the Topographical Survey, soil surveys have always been under the direct control of the provinces, the work being conducted either by the colleges or Departments of Agriculture. Finances have been given to the provinces for the encouragement of soil surveys. However, the Dominion Department of Agriculture has never assumed any direction in soil surveys, nor the work, nor for the manner in which those data were presented on the maps.

In the organization of soil surveys in Canada, therefore, there are at the present ten separate State-like organizations of soil surveys, each of which receives financial assistance from the Dominion as well as from the Provincial Governments. Except for supervision and co-operation, it is impossible for these bodies to be made for keeping these bodies in contact with each other. While this setup has the merit of placing direct responsibility of soil surveying in the hands of the people who are familiar with the soils and the soil problems of each province, it has resulted in a lack of uniformity in the systems of soil classification in the land and soil maps, and in the manner in which the data are presented on the soil map. Considering each province as a separate and distinct unit, it is difficult to know what to use when given good results, but when each province is considered as only a part of the whole country, the results are not entirely satisfactory.

A Hundred Years Ago

Very Many Notable People Were Afflicted With Gout

Neville Chamberlain, Prime Minister of Great Britain, is afflicted with gout.

The news to-day, but as one British writer commented "a hundred years ago it would have been news if we had a Prime Minister who was free from gout."

Lord Burghley, the great Prime Minister of the Virgin Queen, suffered severely from gout. So did the great statesman, the Earl of Charnwood, the elder Pitt. Lord Duff Pitt to whom we owe the name of the time he would lock himself away from his family in a solitary room. His meals, when he could eat, were passed through a slot in the door. Toads and deer may still be seen at Pitt House, Hampstead.

His son, William Pitt the younger, Charles James Fox, Horace Walpole, the fourth Earl of Oxford, and Sydney Smith, the essayist, were other sufferers.

Gout is an excruciating pain in the chief joint of the great toe which the ancients called the "king's toe." The joints of the hands and feet are also affected. The joints swell and become incapable of slightest movement is agony. Nothing seems to bring relief. The attack must wear itself out, and it may last a few days or weeks at a time.

Recipe For Good Living

Lord Horder, the King's physician has a neat recipe for good living. The amenities he would have all people cultivate are these: Clear air to breathe; clean water; the sun; the sea and sky; and sun, the singing of beautiful things, the hearing of beautiful sounds, and quiet and leisure to enjoy all these. In a word, use your senses and be natural.

First Flying Drug Store

The world's first flying drug store has arrived at Croydon, England. The machine is owned by a German medical firm. It is kept permanently in trim, ready to take fast long distance nonstop flights with heavy loads of medicines.

Honor For Barley Grower

Manitoba Farmer Honors Western Canada Barley Growers

John Wieners, outstanding contributing in the last 13 years in improving western Canada barley were recognized when the national barley association held a banquet in his honor at Winnipeg.

The Miami, Man., farmer brought into Manitoba before 1924 a sample of Ontario Agriculture College No. 1 barley. From it he produced a grain suitable for western Canada which qualified for malting purposes because of its high standard and uniformity.

His work came at a time when Manitoba Agricultural Society and the Canadian Barley Growers' Association, was credited with the statement that Manitoba barley was recognized as the worst in the world, used in animal feed.

Seed growers and malsters found in 1924 that Wieners' barley was ideal for foundation seed. Ninety per cent of 5,000,000 to 10,000,000 bushels of barley from Western Canada in recent years which annually receives a malting premium, has been trace to his stock.

Wieners won second place at Chicago in 1926, and third in 1927. The type of barley used with O.A.C. barley, the young man said, is ideal for malting but he captured the world's barley championship at the same time with a sample of two-rowed Canadian. That barley, a product of the University of Manitoba, was used in the United Kingdom by maltsters. He also took the title at the last Toronto Royal Winter fair with a Thorpe exhibit.

Due To Change In Tree

Frost Does Not Color Leaves As Commonly Believed

The first, the leaves of the maple and other trees which leaves fall in the winter, frequently turn glorious combinations of reds, yellows, purples, and browns. It is commonly said that Jack Frost has been busy with his paint brush.

As a result of a change in the

weather, the leaves are not entirely affected. If a very hard

early frost comes, it may cause the leaves to fall before they deck themselves with beauty.

The beauty of the leaves is more directly the result of a change in the tree itself. With the approach of winter, and its rigors, the tree cuts down the supply of chlorophyll, the substance which produces the green color in plants and enables them to take food out of the earth.

As the supply of chlorophyll, or green coloring matter, decreases, other pigments, which are always present in leaves, get a chance to make themselves known.

Consequently, the whole life process becomes more and more sluggish in preparation for lying practically dormant through the winter, the chlorophyll no longer creating the green color of the leaves; the anthocyanins, and the tannins; the last, in some cases, are to be found in the bark of the tree.

WORLD HAPPENINGS BRIEFLY TOLD

Trappers in southern and central Alberta are having a "poor year", it was reported yesterday from the branch. Lack of snow was blamed.

A new motor road from Hamburg to the Danish frontier, as planned, involves the boring of a tunnel more than a mile in length and 100 feet wide.

Excavators at Cattaraugus found a path filled with gold coins worth, by weight \$200 (\$1,000). The coins bore the head of Charles I or James I, and a Latin inscription.

Korea's contribution and implements of war to the value of \$82,420 was licensed under 18 government permits during December, according to a statement at Ottawa by Revenue Minister J. L.似ley.

Edgar Wesley of Toronto, Ontario, received a letter outlining his Tuesday, so he sold it for \$25.00. Wesley's brother-in-law figured he needed a horse, so he bought one for \$50.00 and some horses.

An American tourist missed in Wellington, NZ., December 31 and addressed to W. A. Brown of Peterborough, Ont., arrived there Jan. 10. The 9,000-mile trip was completed in eight days.

Sir Charles G. D. Roberts, author of more than 60 volumes of poetry, fiction and history, celebrated his 78th birthday, Jan. 10. A native of Douglas, N.B., Sir Charles has been a resident of Toronto for the last 12 years.

Manitoba district council of the Brotherhood of Railway Employees urged immediate enactment of Dominion legislation that would require all employers to grant employees at least two weeks' holidays annually with pay.

Lord Tweedsmuir, governor-general of Canada, will respond to a unique toast at a dinner of the Toronto Chamber of Commerce to the memory of a dead man, Lord Durham, who came to Canada 100 years ago and whose report on the rebellions of 1837 is one of the foundations of Canada's constitution.

VERSATILE AND GAY— THIS JUMPER THAT CON- TRASTS ITS BLOUSE

By Anne Adams

Have you ever seen as appealing a little-style as this unusual Anne Adams design? Every little girl will love to have this to wear. To play and adore this type of dress that may boast more than one blouse choice. The blouse is made of a fabric that chooses Pattern 4963, for this model is so easy to put on, that you will have a smile on your face when you first see it. Any "little lady" will appreciate this. The blouse has a wide elasticized belt with a finishing front, trim shoulder bands. Peter Pan collar and a lace hem. Nice in cotton criss, with pleats, plique.

Pattern 4963 is available in children's sizes 2, 4, 6, 8 and 10. Size 6 jumper takes 1½ yards 56 inch fabric. Illustrated step-by-step sewing instructions included. Price 25¢. Two dollars cent. (20¢) in coins (stamp cannot be accepted) for this Anne Adams pattern. Write, plainly, Anne Adams, 1000 Deaderick Street, and send order to the Anne Adams Studio, Dept. C, Winnipeg Newspaper Union, 175 McDermott Ave., E. Winnipeg.

Thirty-nine traffic lights do the work of 15 policemen in the new plan to control traffic in Piccadilly Circus in London.

FLIN FLON

"The Story of Its Finding
and Position To-day"

By FRATT KUHN

Here are the pictures we should have given you last week.

The finding here was terrific, an unnatural climb for untrained legs, but finally I got to the top and found that the hills levelled off on an elevation where men were working.

The ore of water dashed over the ore as the belts moved through and these expert sorters pulled off on an average of 10 per cent. of the ore classed as waste, dropping it down through the side of the building and into the Symons crusher.

After this the belt carried the remainder of the ore which was reduced to the size of stones, then to ball crushers that made it fine, then pasted aside by plenty of water.

From here on it was easier. The ore was washed in troughs. The water was first treated in vats with chemicals that bubbled the water and caused the ore to float. Then treatments to float off the copper and then finally the finest of the tailings were sent to the smelters.

However, the copper concentrates

as they were called when the water was drained out of them, went on to the next stage as needed by the smelters which never close down.

The zinc was extracted from the concentrates by the electrolytic process which carries the zinc through woolen vats in which are suspended thin sheets of aluminum on both sides and at least four men were required to pull the sheets stripping the zinc, which is then melted by being put into a short broad faced crucible and placed on trucks to take to the furnace to melt. It took about 30 minutes to 60 to 90 pounds in weight, ready for shipment.

After entering the zinc department I noticed the building was open to the air on all sides and that every mouth, I didn't know why till I stepped inside, was an open mouth, "zowie!" my mother caught me.

I didn't stay long, even with the protection of a hair-screen, but was told afterwards that the smell was too strong to believe that the smell was caused by particles in hot-air, but rather by the burning of the ore, which was very unpleasant, and I agreed with the latter statement though the workers said otherwise.

The copper concentrates I followed to the top of the smelter which is just below the roof of the building. You'll remember I said the ore contained sulphur. Well, when I got to the top of the building I was hit with a sulphur fume. I almost fell down. And then I was driven in oxygen and nitrogen. This is the result of all the own burning of the rock. Yes, that's right. You can imagine the furnace with some paper and a little wood and lots of air and the ore catches fire and burns. In the bottom of the furnace levels there are big metal fingers suspended from bars and travelling slowly around the furnace, pushing the burning ore gradually pushing it towards the hole in the centre of the furnace when it reaches the hole it falls down. Here the same process except the bare push it towards the hole on the other side of the furnace and falls down the bottom where, with moist impurities it is.

Here is first, a stargazer you. Furnaces fed with powdered coal until the heat is high enough to burn the coal and a few sparks and more heat. Finally its just right, the heat is high enough to melt the metal in the furnace, the molten metal is drawn off in crucibles suspended from the furnace and then it rains down near the ceiling, and owing over to pour into moulds.

The copper bricks are shipped to Montreal, Quebec, a final process takes out any gold and silver. A remnant of the copper is made for which time it is practically 100% pure.

This is a quick and sketchy trip through a mine, a mill and a smelter, but I hope you will understand, my foot, and my leg muscles ached for three or four days from the steep climb.

An outstanding thing about the ground floor was the amount of labor required to do an immense amount of work.

Of course, where water was being heated you had to do the heating, but you and men controlling the operations of the plant, the zinc plant, smelters, foundry etc. but the automatic machinery is so well designed that it is almost perfection. An immense amount of water is used and everywhere that you go as you walk through the plant it is as easy as the process proceed.

Finally when they've got all the ore they've got to get it to the smelter.

LACKING SUPPORT FRENCH CABINET RESIGNS OFFICE

Paris.—Premier Camille Chautemps and his government have resigned. The Popular Front cabinet was shattered by the withdrawal of Socialist supporters.

The resignations came at a time when France faced severe inflation, rest and a weakened franc that slipped on world exchanges despite government efforts to support it.

Chautemps and his cabinet handed their resignations to President Albert Lebrun when it became apparent that withdrawal of support by nine Socialist ministers within the government left no alternative. Socialists, headed by Vice-Premier Blum, though on the crisis by submitting their resignations to the premier, stalling the Popular Front was broken, and could no longer remain in the government.

The Socialists made up half of the cabinet, the remainder being from the Radical-Socialists, headed by Dr. Georges Marrane. The Socialists' decision to withdraw after five party members retired from the chamber of deputies for a private meeting to decide whether or not they could continue to back up the government in its fiscal and labor policies.

Particularly at stake was the premier's firm stand against any coming of the change.

Dale's announcement came spectacularly at a time when the chamber was preparing to vote confidence or non-confidence in the government.

Opposition, in his third speech of the all-night session, accused Communists and Socialists when he told the Communists "I give you your liberty, but I expect you to be solid with us." From the Popular Front solidarity, indicating they would abstain from voting in the confidence motion.

Socialists immediately withdrew for the conference. Feeling had broken free of the Leftist coalition that has governed France since the spring of 1936; they withdrew from the government.

Chautemps' cabinet was formed in June, 1937, to succeed the first Popular Front government headed by Blum. The Socialists, who had reluctantly refused him decree powers to handle France's financial difficulties, then entered the Chautemps cabinet.

Will Be Considered

Farm Machine Bill To Receive Attention Early In Session

Ottawa.—Canada's \$50,000,000-a-year farm implement bill will be given early consideration in the House of Commons with the report of a parliamentary committee forming the basis for a discussion later over from last year.

After some 40 meetings at which an exhaustive inquiry was made into prices, machinery, labor, transportation costs and other relevant aspects of the industry, the committee presented a report which was moved for adoption the day parliament opened. The motion was left standing.

Prime Minister Mackenzie King gave the house assurance that at an early stage of the next session the opportunity would be given for a full discussion of the committee's recommendations.

Conclusions of the committee were that the farmers were paying too much for farm implements and that tariff and other action should be taken by the government to bring the price level down.

—

Outrages.—For the Alberta and British Columbia hearings of the royal commission on Dominion-provincial relations have been switched. The British Columbia hearing will open at Victoria, March 6, and the Alberta hearing at Edmonton, March 21.

Scouts Urged To Help

Ottawa.—An appeal to Boy Scouts throughout the nation to assist the Red Cross in the China relief fund campaign has been issued from Dominion headquarters. The Boy Scout Association following a meeting of the association's executive board. The campaign opens Jan. 23.

British Soldiers Slain

Jerusalem.—Several British soldiers—the number was not immediately revealed—were killed when Arabs attacked a military patrol post near Jerusalem.

Abandon Search For Flyer

Convinced Fate Of Aviator Will Not Be Known Until Melting Of Snow

Winnipeg.—Mike Sweeny ended with ground and aerial crews convinced only melting of winter snow in Riding Mountain national park will reveal the fate of the 22-year-old pilot, Max Flyer, missing since leaving Banff, Alta., Dec. 30, to fly 125 miles north to his plane.

Search pilots believe Sweeny's plane crashed and was destroyed by fire, after hitting the wreckage from a field of snowdrifts.

Planes may search the area after winter snow melt, before spring foliage appears on deciduous trees in which wreckage could be more readily located.

Last of five planes to end the nine-day search, a Free-Press-chartered craft landed at Winnipeg from search stations at Dauphin, 155 miles northwest.

Royal Canadian Mounted Police announced the ground search was ended, at least until spring.

Broke All Records

Prince Albert Stock Yards Unusually Busy During 1937

Prince Albert, Sask.—In volume of livestock marketed, 1937 broke all records at Prince Albert stock yards, Dauphin, G. W. Johnson, northern Saskatchewan Co-operative Stockyards Limited, reported.

The year 1925 was the only one in the 10-year period during which the volume of cattle, hogs, sheep and horses, totalled 55,143 in 1925 and 52,465 in 1926.

The corresponding figures for 1936 were 51,478 and 51,000 for 1935, the poorest year since 1925, 25,662.

Due to lower prices, the volume of cattle, hogs, sheep and horses handled in 1937 was below the corresponding figure for 1936, but higher than that for 1935.

In 1937, estimated at \$885,176 compared to \$1,231,404 in 1928 and \$806,818 in 1936.

Canned Foods

Says Many Are Ignorant Of The Art Of Food Canning

St. Catharines, Ont.—Offering a family from a can is nothing to be ashamed of, R. W. Arango-Jones, central experimental fruit farm, Ottawa, told the Niagara Peninsula Fruit Growers Association.

"Housewives should not be ashamed of feeding their families out of cans," he said. "They are ignorant of the value of fresh fruits and vegetables, but if you feed them out of cans, they will be more healthful."

Arango-Jones said there are at a loss to understand Musolini's insistence that commercial treaties were made by Italy with other countries in 1936 and 1937 without bringing in Victor Emmanuel's rank as emperor of Ethiopia.

Musolini now demands the same for the treaty specifically state Foreign Minister Count Galeazzo Ciano is making it in the name of King Victor Emmanuel, King of Italy and Emperor of Ethiopia. It would also be signed by Ciano as representative of the king.

The United States, it is learned, tried through Ambassador Phillips in Rome to insert in the treaty a paragraph to the effect that the United States signature would be placed on the document.

Arango-Jones was at a loss to know the country advancing them these food values.

Mr. Arango-Jones said there was 10 times as much nourishment in a can of government-inspected fruit or vegetables canned fresh than in dried fruit or vegetables.

He is a speaker at three weeks before presentation on Canadian markets.

Refrigerated Automobiles

Detroit.—The automatically refrigerated automobile to make a motor driving comfortable will not be long in making its appearance, L. W. Chapman, consulting engineer, in a paper he will present at the annual meeting of the Society of Automotive Engineers.

Will Send Books

Reading Matter To Be Provided For Drought Areas

Winnipeg.—The nation-wide campaign of the Association of Canadian Booksellers for books to be sent to the Saskatchewan drought area will be repeated in 1938, according to the Winnipeg young men's board of trade, A. J. Wishart, president, announced.

A library will first be sent to Winnipeg to be sorted into libraries of 50 to 75 books each. The libraries will then be sent to the needy districts. The libraries will be moved from place to place so each community will obtain the books.

THE U. S. TRADE DEAL WITH ITALY IS IN SUSPENSION

Washington.—The United States, seeking to recognize the Ethiopian emperor of Italy as emperor of Ethiopia has resulted in suspension of the Italo-American negotiations for a commercial treaty.

Italian sources said the new treaty to be made in the name of Victor Emmanuel as King of Italy and emperor of Ethiopia and that State Secretary Hull

Negotiations, they said, would now lapse for some months, during which the situation may be clarified.

The stalemate occurred suddenly and apparently was unexpected.

Practically all obstacles had been removed and the two countries had already agreed to a deal interning in Rome.

Now, however, when Italy refrained from their own contribution to the traditional most-favored-nation treatment.

Italians are at a loss to understand Musolini's insistence that commercial treaties were made by Italy with other countries in 1936 and 1937 without bringing in Victor Emmanuel's rank as emperor of Ethiopia.

Musolini now demands the same for the treaty specifically state Foreign Minister Count Galeazzo Ciano is making it in the name of King Victor Emmanuel, King of Italy and Emperor of Ethiopia.

It would also be signed by Ciano as representative of the king.

The United States, it is learned, tried through Ambassador Phillips in Rome to insert in the treaty a paragraph to the effect that the United States signature would be placed on the document.

Arango-Jones was at a loss to know the country advancing them these food values.

Mr. Arango-Jones said there was 10 times as much nourishment in a can of government-inspected fruit or vegetables canned fresh than in dried fruit or vegetables.

Will Make Annual Trip

Trust Fund Enables British Schoolboys To Visit Canada

London and London, chairman of the Allied Industrial Services, donated £125,000 for the establishment of a special trust fund under which 50 schoolboys will be enabled to visit Canada annually during the next 10 years.

Last year Mr. Rhodes took 30 schoolboys on a return trip to Canada to attend the opening of the new school under the patronage of Eric Baldwin, who is known as the W. H. Rhodes Canada Educational Trust.

ILLNESS STOPS TOUR

Canadian Boy Held By Italian Authorities Was Released

Ottawa.—Robert Musk, young Ottawa and Prince Albert, Sask., student, reported held in jail last month by Italian authorities for two days without explanation, is "now okay" in Athens.

H. J. Hillier, a friend of Musk's living near here in suburban Linden, said a cable from the boy's parents, stating that his safe return to the capital was due to the British consul's intervention.

Former student at Ashbury college and Légaré collegiate here, Musk wrote from Prince Albert Dec. 18 to his parents, saying he intended to go to the United States to study law.

On Dec. 20, he was arrested by Italian authorities and held in jail for two days.

He was released on Dec. 22, but remained in the country because of his illness.

Musk left Canada on a grain boat last July.

SAYS FARMING MUST BE PLACED ON SOUND BASIS

Opposes State Medicine

Dr. Morris Fleischman Is In Favor

Winnipeg, Ont.—The medical profession must give leadership in the field of medicine or that right will be taken by the state, Dr. Morris Fleischman, president of the Saskatchewan Medical Practitioners Association, said in an address before the Essex County Medical Association.

Although the state had done much for medicine, particularly in the field of public health, there were things the state cannot do but try to do, Dr. Fleischman said. "And they are advocating these things in ignorance of what is the practice of medicine."

He contended state medicine would mean deterioration in medical service, loss of the profession's initiative, dedication to medical methods and a lowering of the standard of living.

He contended state medicine would mean deterioration in medical service, loss of the profession's initiative, dedication to medical methods and a lowering of the standard of living.

Mineral Wealth Of North

Some Of The Richest Gold Properties

In Canada To The Northwest
Hastily built shanties had started to be a home, a tique was perched precariously on the back of his head and his scuffed shoe-packs looked as though they had tramped over many miles of rocky land, but Eric Pyle's eyes had never been dulled by anything more exacting than searching for gold in the bottom of a pan. They were a bit wrinkled in the corners like those men who have a lot of time in the open gazing at the sun. His skin was clear and bronzed. He was slightly stooped, not the stoop of sedentary workers, but rather a bend from the middle, as though he still had the prospectors' pack on his shoulders.

"These bums in the city," he said, "make three times what I do, a strong, single man stick around waiting for relief or handouts when he is within striking distance of the same kind of country that built the fortunes of the Wrights, the Carnegie, the Rockefellers, the Hammans? I have bought them moral in Prince Albert, but they had to listen to a lecture."

Eric was just down from the Northern Territories, at Gordon Lake, away north of Goldfields. Yellowknife was the takeoff point for the last hop of the airplane trip to Gordon Lake. Smelters had 300 men working there now, operating one of the richest looking gold properties in Canada. But Gordon Lake is the northern frontier of present prospecting. Away north of Gordon Lake, Eldorado, a bigger and bigger radium-silver mine within 25 miles of the Arctic Circle. But Eldorado is an established mine, the leading radium producer of the world. It is the new properties in that vast area between Goldfields and Eldorado that are attracting attention and Prospector Flirt has just come down from 100 miles and is about to meet the property that it and other prospectors located for Consolidated Mining and Smelting Company at Gordon Lake.

The big companies are rolling the map further and further north. It was in 1936 that the huge Consolidated Mining and Smelting operation, and that of Athabasca Limited, put up their first royalties paying plants. Now Goldfields has a year-round population of about 900 people, and all the facilities of a regular town.

Just A Suggestion

How Chicago Terminal Could Conserve Music For Travelers

With commendable thoughtfulness, a Chicago passenger terminal is staying in the lead for the music season, to cheer and comfort ship passengers, and travelers. As doubtless was anticipated, the innovation had its effect in soothing perturbed passengers and even mollifying the most irascible travel agent.

Surely Christmas carols cannot appropriately be played the year around, we venture to recommend to the organist a few distinctly suitable numbers which she might try out in her console.

Honeymooners might like "Bluffin' Off To Buffalo," with its Niagara Falls implications. Those who like jazz will find tempo enough to care for a remembrance of that old typical song, "I Want to Go to Morrow and I Want to Go To-day." In honor of the train crews there are, "I'm A Workin' Man," "I'm Easterner," "Came Jones," The bright handbags could chime in for dear old "Delsa ware Lacka-wan." Tired little ones in the waiting room might enjoy "Sleepytime Express." And when the picnic excursion from the Coney Island gets ready to return home the organists can pull out all the stops and play that stirring spiritual, "Get On Board, La! Chilum There's Room for Many More." —Christian Science Monitor.

Right To The Point

Newspaper Man Disposed Of Estate In Two Weeks

The wife of Alfred M. Heron, 84-year-old Atlantic City newspaperman, city official and south Jersey historian, who died in New York, was filed for probate. It named as executors and co-executors of only twelve words:

"All that's mine when I am dead. 'Goes to Jessie—enough said."

Jessie, an unmarried daughter, operates a small store in Ossining, N.Y. The estate was valued at \$500.

The Vienna mind is coming money for China, Bulgaria, Bolivia, and Paraguay.

In a Times Square, New York, cigar store, the pay station telephone book is worn out every 72 hours.

THE MOST FAMOUS OF LONDON'S MARKETS

A new view of the Calaisian Market, London, the most famous open-air market where you can buy anything from an elephant to a pin.

Famous All Over World

Hand-Made Rosaries Produced By Italian Villagers

Considered the most highly peak of the Apennines—backbone of the Italian peninsula—stands the tiny village of Loreto, one of Europe's most famous shrines and towns, now completely abandoned by its pilgrims.

Since the 14th century, Loreto has been a celebrated resort of pilgrims. Our Lady of Loreto was chosen as the patroness of Italy in 1389.

But during the past

ten years the ever-growing popularity of the shrines of Lourdes cast Loreto into the shade.

No longer fed by pilgrims and tourists, once the principal source of the small town's existence, the 5,000 inhabitants of Loreto have dedicated themselves to making hand-made rosaries, medals and religious articles.

Each family has at least four or five members who are specialists in this work. Loreto exports rosaries to all parts of the Catholic world.

Loreto rosaries are

famous the world over; they are made at extremely low prices. A worker turns out about 12 hand-made rosaries a day, earns six lire (\$1.50) a week.

Each family has at least four or five members who are specialists in this work. Loreto exports rosaries to all parts of the Catholic world.

Loreto rosaries are

famous the world over; they are

made at extremely low prices. A worker turns out about 12 hand-

made rosaries a day, earns six lire (\$1.50) a week.

Loreto consists of little more than a single long street full of shops in front of which, baking in the sun, the women sit on long benches and chat. These rosaries cost relatively little to make for gift to high church ecclesiastics.

The women, sitting on low benches, work their rosaries while the men, in heavy sport around which various yards of thin metal string is wound. They carry the various colored beads, which are generally made of wood or glass. In a sense, they are around the necks of the men, with which they carefully keep the metal while they string the beads, chatting and laughing while they work.

New modern factories which turn out large quantities of rosaries at low prices recently have been set up in Loreto. But the rosaries made there are sold all over the world.

Interest in the work never ceases,

and the women of Loreto continue

their work undisturbed by the competition of the local factories.

Waterway Route

Joint Commission Does Not Favor Construction Under Existing Conditions

The international joint commission confirmed a recent forecast that under existing conditions it was reported against the proposed construction of a deep waterway from Montreal to New York by way of Lake St. Lawrence. The commission filed its report with the governments of United States and Canada.

The report suggested the proposal be further considered in the event of the St. Lawrence seaway project being completed.

There can be no such thing as sound outside the latter's ear. Thus far, however, the waves, capable of producing the sensations known as sound upon the auditory nerves.

A hundred square miles of ocean bed is revealed when the tide goes out at Mont Saint Michel, France. When the tide comes in, it comes in rapidly.

Just A Temporary Change

Shift Of Gulf Stream Is Of Very Short Duration

Invariably, when the Gulf Stream, which peaks off the coast of the Azores, shifts to the northward, a section of the Atlantic becomes completely abandoned by its pilgrims.

Since the 14th century, Loreto

has been a celebrated resort of

pilgrims. Our Lady of Loreto was

chosen as the patroness of Italy in

1389.

But during the past

ten years the ever-growing popu-

larity of the shrines of Lourdes cast

Loreto into the shade.

No longer fed by pilgrims and

tourists, once the principal source

of the small town's existence, the

5,000 inhabitants of Loreto have

dedicated themselves to making hand-

made rosaries, medals and religious

articles.

Each family has at least four or

five members who are specialists in

this work.

Loreto consists of little more than

a single long street full of shops in

front of which, baking in the sun,

the women sit on long benches and

chat. These rosaries cost relatively

little to make for gift to high church

ecclesiastics.

These rosaries are

made at extremely low prices. A worker turns out about 12 hand-

made rosaries a day, earns six lire (\$1.50) a week.

office.Miss Grace Cameron was hostess at
the gift party at the home of Mr. and
Mrs. Otto Schiebel on Friday evening
in celebration of his birthday. The
Post office was open in bridge and about 25 guests were
present. Prize winners were Mrs. J. Smith
and Mr. J. C. Spence. Congratulations
to Mr. and Mrs. Claude Crossman.

TREE PLANTING IN THE WEST

Forest nursery stations located in
the southern and central parts of the
southern division of agricultural land
distributed a total of 9 million trees
during the fiscal year ending March
31, 1937. If the number of trees
and the distribution of them will
require from 18 to 20 million trees
to be kept coming along in production.
The work involved in shipping
18 million trees and caring for twenty
million more in process of production
is very heavy.Caragana ash, elm and oak have
withstood the past five years and are
expected to do well without any losses.
The forest nursery station report
Caragana ash and elm in combination
are recommended as being able to
withstand the severe drought and
temperature conditions.

EVEN IN 1882!

The old files of the Amherstburg (Ont.) "Independent" produce an editor-
ing written on the eve of 1882.We think it is appropriate to copy it for
you all are very eloquent. Visit armfuls
of millions of human beings armed with
the most destructive weapons that
industry can manufacture and destroy
2. Numbers of secret societies springing
up here and there for the purpose of
overthrowing existing governments
and the like.Hubb—Haven't always given you
my salary check on the first of every
month?—Mrs. Brown is going to dye
her hair and the Whites are having a
luncheon.Wife—Yes, but you never told me
you got paid on the first and the 15th
you embrzhered! —Two men, Wood and Stone, were
standing on a corner. A pretty girl
walked by. Wood turned to Stone,
Stone turned to Wood, they both
turned to the girl and the girl turned
into the postoffice.Mrs. Ernestine husband who has
ventured to assert himself: Now
Henry, understand once and for all,
just because you've been on a two
month's tour in Italy don't get the
idea you're a Mussolini!The reporter was sent to write up
a Sunday school social. Next day he
asked calling on his mother for a beer,
what do you mean by this? "Among
the most beautiful girls was Mr. Horatio
Lucius Dingley, Old Dingley isn't a bad young man, and he's
one of our principal shareholders!""I can't help that," replied the reporter.
"That's where he was."Jean: "Did you see in the paper
that a young couple were poisoned
through eating chocolates?"Jack: "Ay, I fancy I did, lass, but
what's the use?""Nothing, only I was thinking how
safe we both are."
